

Product: CEDERROTH EMERGENCY EYE WASH
POCKET MODEL
Reference code: 722110

1. General description

A personal eyewash bottle containing sterile, buffered, saline eye wash solution.

The bottle is easily opened and ready to use by twisting off the dustcover. The integrated eye cup helps keeping the eye open during rinsing and ensures a generous flow without unnecessary waste. The bottle is shaped to fit into a pocket.

Tamper resistant: Product is filled in a sealed container that cannot be closed once twisted open. Before use remove green cap. If bottle leaks do not use.

2. Intended use

The Cederroth Eye Wash Pocket Model is intended for flushing the eye to reduce chances of severe injury caused by acid, alkali, or particulate contamination. The Cederroth buffered Eye Wash has a neutralising effect on splashes from alkalis and acids. The effect is in general stronger for alkalis than for acids.

The Cederroth Eye Wash is intended for the first acute phase at the very accident site before getting to a plumbed or self-contained eye wash equipment or seeking medical attention. In case of contact with corrosive substances, flush at least 20 minutes (several bottles are needed).

3. Technical description

Product dimensions :

(l x w x h) mm: 45 x 66 x 163

Fill volume (ml): 235

Material

Liquid Sterile, isotonic Sodium Chloride 0.9%,
Buffered with Sodium Borate to neutral PH.
